To Neversink Town Supervisor Christopher Mathews,  
Hi have property in Claryville. This project is huge with multifamily buildings and a huge hotel. How is this good for Claryville. People come here for it's pristine nature. This will be like a small Nyc within the Catskills. We are strong independent people here. We do not need the things Keriland thinks we need. There are streams and reservoirs that are much needed to stay pure as we can see with what is going on this summer no rain fall. This would set precedent for other developers to cut trees and build as they please and then as history proves people will move out and then things go down hill again ,and things get polluted, crime goes up and then a new beautiful place is sought to be changed and the cycle begins again. Perhaps Neversink should be a dry town again. It seem to be attracting this change too. We have to learn from history. Let the skyscrapers stay In big cities like NYC . Let the noise stay in NYC too. We have to preserve this land and other Parks as population is growing it is expanding one can see it on Route 17. Please dont swayed by their naked promises.

Thank you  
Risha Gorig
